CLIENT SLEEPS WELL

CASE: **EVIDENSIA MEVET** - VETERINARY HOSPITAL  
PROJECT MANAGEMENT BENCHMARK

**TIMO KAMPURI**

CEO - SARA

WATCH OUR  
VIDEO:

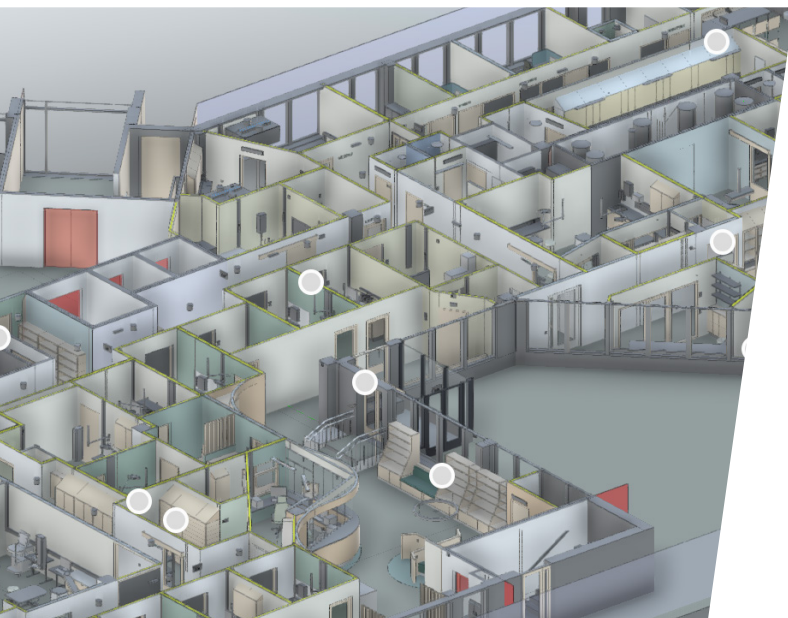

"Europe's finest Veterinary Hospital in a tight schedule" The Evidensia Mevet project demonstrated what can be achieved with careful initial development, right tools, professional project management and thorough cooperation.

During the project, all stakeholders had access to a shared platform that enabled active observation and commenting of up-to-date models and plans. In addition, weekly planning meetings ensured smooth and continuous progression.

This case was a perfect example of a well supervised and managed project. Co-operation was seamless between all project members and sharing of information was impeccable from start to finish.

Carefully designed and now proven process is suitable for different kinds of projects  
- not only for veterinary hospitals.

One focus point in this project was user orientation. With the help of received client and end user feedback, the versatile needs were considered and brought through designs to the site, thus ensuring an excellent outcome.

SARA's project engineer Konsta Ylinen did a master's thesis from this project. The thesis dealt with managing a user-oriented business premises construction project.

Konsta interviewed stakeholders to get a better understanding of the user centric process as well as broader picture of different needs of the parties involved. The customer feedback was extremely valuable for successful execution.

As a result, Evidensia is happy with the project and will start conceiving the outcome for further purposes.
