FORESTRY MACHINES

PROTECTING AND CARING FOR NATURE

IS OUR ONLY

future

We grow with you.

We evolve thanks to you.

Our company was founded in 1953 and from the very beginning we have shown a strong will to grow. In the beginning, our market was only national, but in 2001 we expanded into the export market abroad and commercially, exhibiting in recent years, from 2001 to the present day, at numerous trade fairs in order to introduce our products globally.

We have facilities of 8,000 m², which house our manufacturing section, the machinery warehouse, the spare parts service, the workshop, the technical office and the rest of the offices.
