

SH-TEKSOR OY

***Specialist in stainless steel
threaded fittings***

Quality and delivery reliability with decades of experience

SH-Tekso Oy is Finland's leading producer of stainless steel threaded fittings. Formed in 2018 through the merger of SH-Trade and Tekso Oy, our roots date back to the early 1980s. Our way of working is a pragmatic blend of confidence based on experience with a youthful and open-minded approach to serve customer needs.

Our goal is to expand our exports and further grow our operations. To support this goal we will continue to develop the processes and tools from our new ERP system. This will enhance our operations and further improve the quality of our products.

SH-Tekso Oy is a subsidiary of the Swedish company Nords International AB, which also includes our production facility Ratas in Estonia. We work closely together, for example in the purchase of raw materials and balancing the production between Finland, Sweden and Estonia.

Key figures of our corporation:

- » over 100 employees
- » annual turnover about 20 million euros
- » production capacity over 4 million pieces per year

Quality products for different needs

Customer specific products

Significant part of our production consists of customer products. By bringing our expertise already into the customer's design process we are able to ensure a smooth manufacturing process and the best possible quality for the product. We specialize in batch production and deliver even large orders quickly.

“ We are the only Finnish manufacturer of threaded stainless steel fittings that conform with the European pressure vessel directives (PED 2014/68/EU). Our global sales and distribution network includes other Nordic and Central European countries. ”

Standard products

We manufacture both standard and modified products manufactured from materials such as stainless steel in different grades, aluminium and brass. They represent the best in Scandinavian quality, in compliance with quality directives including full traceability.

- » fittings in accordance with pressure vessel directive with EN 10204. 3.1 certificates
- » threaded fittings with BSP or NPT threads
- » size class 1/8 inch to 4 inches
- » short delivery time, products ex. stock.

“ Our vision at Nords Group is to become the leading manufacturer of fully machined stainless steel threaded fittings in Europe. ”

Prokone Oy, maintaining production.

Experts in CNC machine tool maintenance.

Uncompromising quality

The core of our operations is unreserved customer satisfaction with flawless products delivered within the agreed delivery time.

We conduct constant monitoring of service and product quality in both our own operations and those of our subcontractors. In this way, we can guarantee our customers receive functional, safe and traceable products that meet the requirements of the directives.
